Repeater report for April 2026

Things have been quiet on the repeater system of late. Even C4FM covering the world is not busy. All the equipment bar Mt Graham seems to be running well and I know I shouldn't say that, as Murphy is probably waiting around the corner. Mt Graham is suffering from bad clicks on receive through the repeater. On the hand any signals coming in the links are repeated perfectly.

I'm not sure about echolink as I don't use it and have not heard any signals coming through it. Is this the one for the new computer? If so, Norbert is working on it.

The new voltage and current measuring for The Bluff is undergoing some hardware construction ready for installation. Norbert is doing this and Maxwell is doing some testing of the equipment to test for any hidden bugs in the software. Nick has made arrangements to replace the current solar charger with a more suitable one.

We have received acknowledgement from the WIA that The Bluff is now licensed for the APRS repeater. That's re-assuring news so members should now use the APRS through VK5RMG callsign.

The Willalooka repeater move is in the care of Peter and he has kept in touch with all the organisations involved and is gently moving things along.

Big thanks to the repeater maintenance team.

John VK5DJ
